Recap

Dockerfile

```
FROM <base image>
```

```
COPY <app code>
```

```
RUN <install deps...>
```

```
EXPOSE <network>
```

```
ENTRYPOINT <app>
```

Dockerfile

```
FROM <base image>  
COPY <app code>  
RUN <install deps...>  
EXPOSE <network>  
ENTRYPOINT <app>
```

Dockerfile

```
FROM <base image>  
COPY <app code>  
RUN <install deps...>  
EXPOSE <network>  
ENTRYPOINT <app>
```

\$ docker build

**Multi-stage builds help us
create small images suitable
for production.**
